## Whisper Standard Laser (WSL-FS series)

WhisperIT® WSL-FS series lasers offer robust packaging for higher power operation. Excellent signal-to-noise and low coherence leads to a reduction of laser speckle and the elimination of diffraction patterns. High reliability & consistent performance enables demanding biomedical and scientific instrumentation applications.

WhisperIT® WSL-FS series lasers are laser diode-based continuous-wave solid-state lasers that offer significantly increased lifetime and improved efficiency over DPSS, HeCd or Argon lasers. The proprietary WhisperIT® technology eliminates mode hops and delivers lasers with extremely low optical noise.

The WhisperIT® WSL-FS series lasers are available with round or customize beam shape and are tailored to specific application requirements.
